Mitsubishi Hitachi Power Systems (Thailand) Ltd.

Re: News Articles on Bribery case involving Mitsubishi Hitachi Power Systems, Ltd.

This week, several news articles were reported here in Thailand, regarding the bribery case involving Mitsubishi Hitachi Power Systems, Ltd. (“MHPS”). However, some of those articles seem to be based upon misunderstanding about the case.

We confirm that it is the fact that MHPS is cooperating with Japanese Prosecutors Office for the bribery case, relating to the trouble with relevant local authorities and local communities in Khanom District, Nakhon Si Thammarat Province. Such trouble was happened in February 2015 when MHPS and its subcontractor tried to unload heavy equipment for Khanom IV power plant, at the temporary jetty near the construction site.

We also confirm that such trouble was settled by MHPS personnel and its subcontractor, without consulting with our customer.

We sincerely apologize for any inconvenience suffered by our customers and relevant people due to news articles different from our confirmed case above.
